

Find the Solution for the following:

1. Create MY_EMPLOYEE table with the following structure

NAME	NULL?	TYPE
ID	Not null	Number(4)
Last_name		Varchar(25)
First_name		Varchar(25)
Userid		Varchar(25)
Salary		Number(9,2)

2. Add the first and second rows data to MY_EMPLOYEE table from the following sample data.

ID	Last_name	First_name	Userid	salary
1	Patel	Ralph	rpatel	895
2	Dancs	Betty	bdancs	860
3	Biri	Ben	bbiri	1100
4	Newman	Chad	Cnewman	750
5	Ropebur	Audrey	aropebur	1550

3. Display the table with values.

```
select * From My-employees order by ID;
```

ID	Last_name	First_name	userid	salary
1	patel	Ralph	rpatel	895
2	Janes	Betty	bjanes	860

4. Populate the next two rows of data from the sample data. Concatenate the first letter of the first_name with the first seven characters of the last_name to produce Userid.

```
insert into My-Employees (ID, last_name, first_name, user_id, salary)
values (4, 'newman', 'chad', lower(substr('chad', 1, 1) || substr
('newman', 1, 7)), 750); insert into My-Employee (ID, last_name,
first_name, user_id, salary) values
```

5. Make the data additions permanent.

```
commit;
```

```
(3, 'Biri', 'Ben', lower(substr
('Ben', 1, 1) || substr('Biri',
1, 7)) || 1100);
```

6. Change the last name of employee 3 to Drexler.

```
update My_employees set last_name = "Drexler" where
ID=3;
```

7. Change the salary to 1000 for all the employees with a salary less than 900.

```
update My_Employee set salary = 1000 where salary < 900;
```

8. Delete Betty dancs from MY_EMPLOYEE table.

```
delete from MY_EMPLOYEE where first_name = "Betty" AND  
last_name = "dancs";
```

9. Empty the fourth row of the emp table.

```
update MY_EMPLOYEE set last_name = NULL, first_name = NULL,  
user_id = NULL, salary = NULL where ID = 4;
```
